Force 507

The Sonor Force 507 Set is designed for beginners taking their first steps into the drum community. With its unbeatable price-performance ratio, the Sonor Force 507 set is the hallmark of long-lasting musical pleasure, at a small price.

Force 507 Sounds

Because beginners shouldn't have to hide from the major players, the 9-layer basswood shell of the Sonor Force 507 Sets offers the needed punch to keep the beginning drummer from falling by the musical wayside.

Sonor Force 507 Shell Design
The basswood shells deliver maximum strength, perfect curving, and neutral tuning thanks to tension-free cross-lamination of the individual layers of wood (CLTF Cross Laminated Tension Free Process). The covered finish is very sturdy and long lasting, and the workmanship is impeccable.

Sonor Force 507 Shell Thicknesses

9 layers for bass drums, tom toms, floor toms and snare drums = 7 mm

Bass Drum Legs – On Solid Footing, Everywhere You Go!
The bass drum legs can be turned to convert them from rubber to metal, and adjusted using a fastening screw.

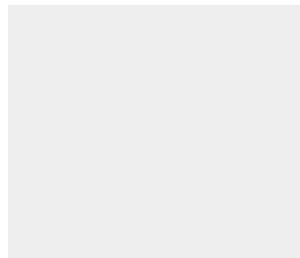

Tuning Lugs with TuneSafe – Unbeatable Features, Right from the Start!
The new Sonor Force tuning lugs are equipped with the TuneSafe tuning safeguard feature, which prevents tension screws from loosening. And particularly for the beginner, this means: it keeps the 'mood' even longer.

Pre-Muffled Bass Drum Heads – For Crisp Sounds!
Pre-muffled batter and resonance heads on the bass drum provide 'all-round' powerful sounds.

Short Tom Sizes – Simple Tuning, Short Shell!
The new Sonor Force 507 tom toms with 'short' shells generate a controlled pitch and can be positioned lower and easier-to-reach in a 'beginner's' set. A quicker way to join the world of drumming.

Double Tom Holder – Sturdy and Individually Tailored!
With the tried-and-tested 'Ball Clamp' system, the tom toms can be securely positioned wherever the drummer wishes.

Double-Braced Hardware – Sturdy and Steady!
